RISHABH JANGID

Mumbai, India | +91 88280 93517 | rrishabhjangid@gmail.com | LinkedIn | GitHub

PROFILE

B.Tech Data Science student at NMIMS University (Semester 5, CGPA 8.27/10) with a strong foundation in machine learning, statistical inference and optimization. Experienced in using Python to automate reporting, consolidate multi-source data, and build predictive models and BI dashboards.

EDUCATION

Bachelor of Technology in Data Science | NMIMS University, Mumbai | 2024 – 2028 (Expected) | CGPA: 8.27/10

Key Coursework:

- Bias-variance trade-off, model evaluation, matrix decomposition, gradient descent and constrained optimization, backpropagation, PCA, Fisher Discriminant Analysis, Support Vector Machines
- Maximum likelihood, Bayesian inference, hypothesis testing (Z, t, Chi-square), ANOVA/MANOVA, regression diagnostics, Ridge and Lasso, logistic regression (GLMs), non-parametric tests
- Applied AI, Optimization Methods, Stochastic Processes, Time Series Analysis, Data Wrangling, Data Structures & Algorithms, DBMS, Cloud Computing

TECHNICAL SKILLS

- **Machine Learning & Statistics:** Regression, Logistic Regression, Classification, L1 Regularization, VIF, PCA, Hypothesis Testing, ANOVA, Model Evaluation, Optimization
- **Deep Learning:** Neural Networks (forward/backpropagation), L2 Regularization, Dropout, Gradient Checking, Mini-batch Optimization, Hyperparameter Tuning, Batch Normalization, TensorFlow
- **Programming & Data:** Python, C++, Pandas, NumPy, Scikit-learn, Statsmodels, Matplotlib, OpenPyXL, xlwings
- **Visualization & BI:** Power BI, Tableau, Advanced Excel, Matplotlib
- **Automation & Tools:** Playwright, Jupyter Notebook, Google Colab, Git, AWS | **Other:** AutoCAD, DaVinci Resolve, Canva

EXPERIENCE

Summer AI Intern | Airtel | May 2026 – July 2026

- Automated four recurring business reports using Python and OpenPyXL, reducing combined preparation time from approximately 15–17 minutes to 3–4 minutes per reporting cycle.
- Built workflows to clean and transform tens of thousands of rows from Outlook and two Airtel database sources, adding required columns and applying reporting formulas.
- Scheduled hourly Telegram delivery from 10 AM to 11 PM for store-, manager- and zone-level reporting across prepaid, Wi-Fi and postpaid plans; compared automated outputs against manual reports.

SELECTED PROJECTS

Multi-Agent Travel Planner with Disruption Monitoring & Replanning | Python, Streamlit, Ollama (Qwen2.5 7B)

- Built an orchestrated multi-agent workflow for flights, hotels, weather, activities, monitoring and replanning; generated costed itineraries and re-ran hotel selection when a budget constraint was exceeded.
- Used a local LLM to convert free-text requests into validated structured constraints, while keeping itinerary decisions in deterministic Python; added monitoring for flight status, weather, availability and closures, plus offline tests with a mocked LLM.

White Wine Quality Classification | Python, Scikit-learn, Statsmodels

- Analyzed 4,898 white-wine samples with EDA, correlation analysis and statistical diagnostics; developed a logistic regression classifier using feature transformations, standardization, VIF analysis and L1-regularized feature selection.
- Recorded 79.08% test accuracy on an 80:20 split for classifying quality scores as ≤6 versus >6.

Personal Apple Music Wrapped Analysis | Power BI

- Processed personal listening history and built an interactive Wrapped-style report covering peak listening hours, genre distribution, and artist affinity over time.

IPL Data Visualization & Performance Analysis | Tableau

- Built a dashboard analyzing player performance and match trends across multiple seasons.

CERTIFICATIONS

- **Deep Learning Specialization** — DeepLearning.AI via Coursera (in progress, 2 of 5 courses completed): Neural Networks and Deep Learning; Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

LEADERSHIP & VOLUNTEERING

Editor, Film & Dramatics Committee | NMIMS | 2024 – 2026

- Led post-production for a college short film, managing the workflow from raw footage to final export.

Mathematics Tutor | Deep Griha Society (NGO) | May 2025 – Jun 2025

- Tutored students from primary through higher-secondary levels in mathematics.
